

Public Hearing Follow-Ups

- **Can we operate SSIMS without using Stairwell #7?**
 - No, however, we can explore a different floor utilization for that wing of the building. In the 3-story 1934 original wing (east wing), there are approximately 9–10 classrooms per floor. Currently each floor is split in half with the north end dedicated to Sligo Creek ES and the south end dedicated to SSIMS. To create improved circulation patterns, we are exploring the possibility of re-evaluating the split between Sligo Creek and SSIMS and the overall usage of that wing for SSIMS.
- **Why are we not concerned about utilization at Woodward?**
 - We believe we have built in enough capacity to handle the new development.
- **Why are we not concerned about utilization at Wootton at Crown Farm Site?**
 - We have the pipeline development accounted for.
 - With enrollment projections decreasing in the out years and a future master planned addition we feel confident that the Crown Farm site can accommodate the enrollment.
