

MCPS Staff

Michael Shpur has devoted his career to facilitating the design and construction of sustainable, flexible and positive learning environments. An architect, Mr. Shpur's expertise in school design and construction, his awareness of the impact of design trends, and his remarkable institutional knowledge of MCPS facilities are invaluable to the school system. Mr. Shpur is involved in the planning, design consultant selection, and design review of hundreds of school construction and improvement projects. He lends his expertise to decisions regarding space planning, product selection and creative solutions. He spends countless hours attending community and public meetings related to MCPS projects. He also led the effort toward Leadership in Energy and Environmental Design certification of new schools. Mr. Shpur also is one of the coordinators of the Facility Project Request process, which involves the review and recommendation of 100 to 200 requests per year.
