BOE Selection of Approach

BOE and IAC/MSDE Approval Required

Feasibility Study Goal

**To determine the appropriate
Approach to a project.**

Considerations include, but are not limited to:

- **Cost / Life Cycle**
- **ADA & Code Compliance**
- **Sustainability**

NOTE: STUDY RESULT IS NOT A DESIGN

How Will We Achieve These Goals?

- **Gathering Information, Surveying Building and Evaluating Existing Conditions**
- **Developing Approach Concepts**
- **Developing Approach Plans**
- **Submitting Final Report to BOE and State (IAC/MSDE)**

NOTE: STUDY RESULT IS NOT A DESIGN

Community Engagement

Communicate - with Principal, PTA, and MCPS to determine and coordinate the best methods of communication for this project.

Interact - During virtual community meetings using polling and Zoom chat.

Survey - Community at large for quantitative research.

Interview - Key stakeholders for qualitative research.

Listen - To all community members and make sure they feel heard
- use interpreters.

Encourage - involvement from all stakeholders (students, staff, community, etc.)

Community Engagement

Community Poll

Community Input

What is the
most critical aspect
Burning Tree Elementary School
that should be improved
in the new design?

Needed Improvements

- **“School MUST be ADA compliant and better accountability for special education students and places to support behaviors”**
- **“Safe drinking water fountains” – “Access to safe and clean water (replace old pipelines with lead)”**
- **“Building expansion” – “Having enough space for the students going forward” – “No more portable classrooms!”**
- **‘Dedicated kids and ride route for drop off and pick up’ – “No car pick up loop”**
- **“Better climate control”**
- **“Space for school gatherings and events” – Gym, Cafeteria, Outdoor space, Yard space.**
- **“The safety of staff and students is priority with having enough space for all students to have a positive educational experience including equal access to all areas of the building.” – “Fenced in campus”**
- **“Bathrooms for younger students, less mold/roaches, and windows in offices that do not have them.”**
- **“The bi-level design is horrible”**

Community Input

What feature
of the current
of Burning Tree Elementary School
do you value most
and hope to see carried forward
in the new design?

Existing Valued Features

- **“Kid-friendly community feel - I would like to keep the size small. The school is a wonderful community.”**
- **“Lots of outdoor blacktop space”**
- **“The main playground” - The separate kindergarten playground”**
- **“Special sentimental features, like artwork for gym teacher and central frog at entrance.”**
- **“Green spaces around the school”**
- **“Community spaces”**
- **“I want to culture to be carried forward.”**
- **“None”**

Feasibility Study

Approach 1

- Renewal

Approach 2

- ADA Upgrades & Lighting Renovations

Approach 3

- Major Renovations & Addition

Approach 4

- New Replacement School

Approach 1 – Project Goals

Renewal

Work Collaboratively with all Stakeholders to:

1. Provide new finishes throughout.
2. Provide new exterior doors and windows.
3. Update Mechanical, Electrical and Plumbing systems.
4. Provide new chiller, boiler and generator.
5. Install new roof.

Approach

1

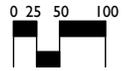

Renewal

Site Plan

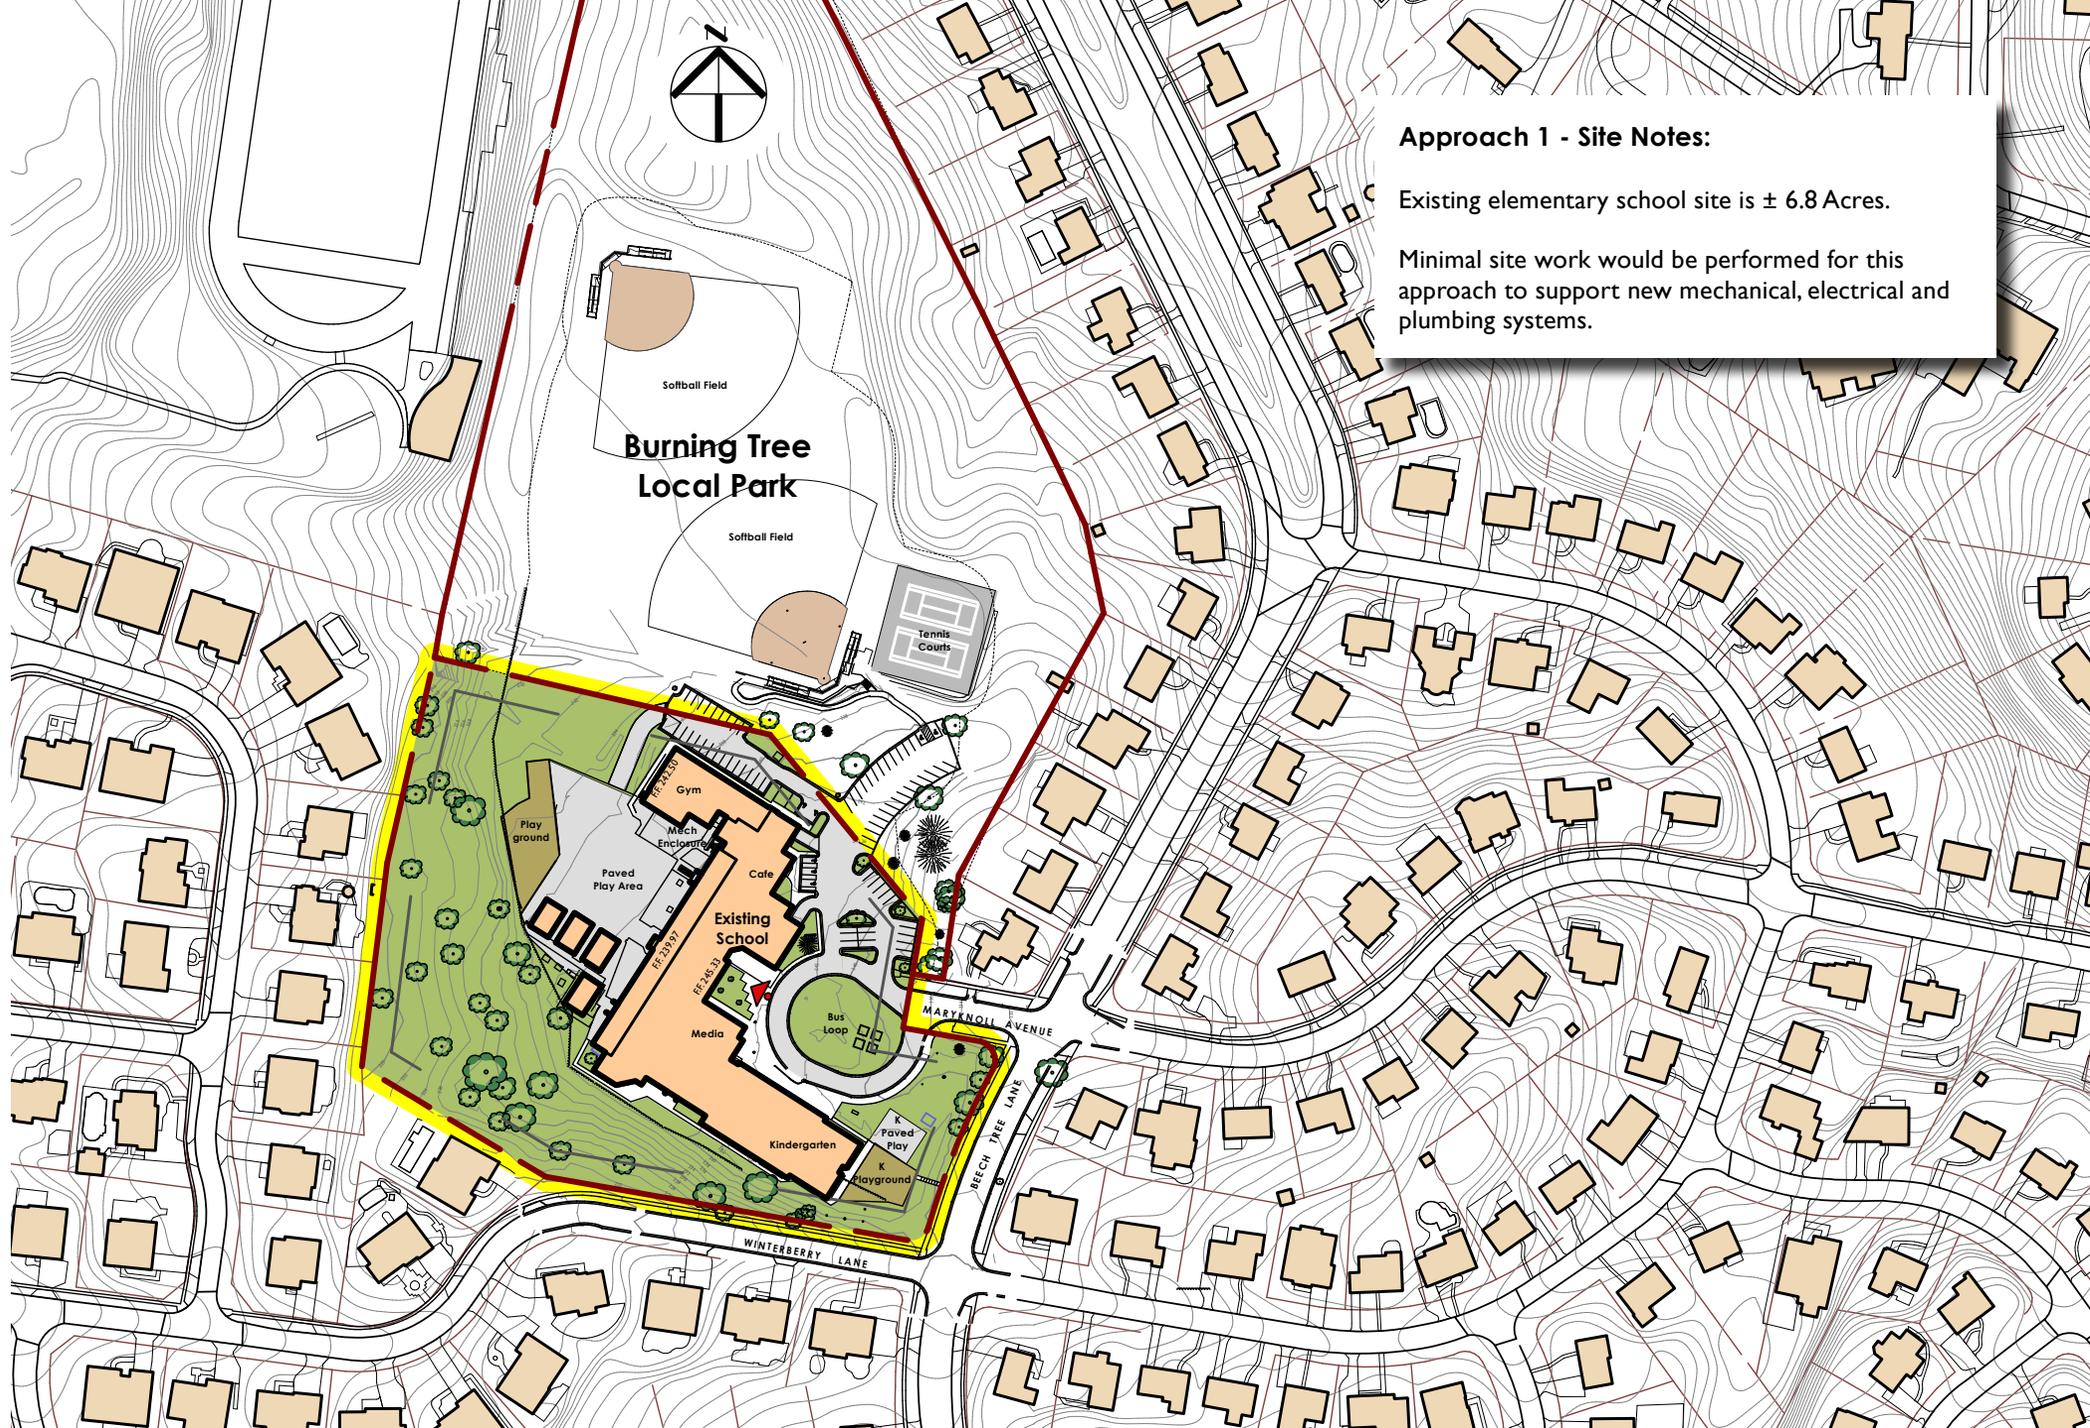

Burning Tree ES

27 May 2025

Parking Tabulations

Standard Parking Spaces	68
HC Parking Spaces	7
Total Parking Spaces	75

Approach 1 - Site Notes:

- Existing elementary school site is ± 6.8 Acres.
- Minimal site work would be performed for this approach to support new mechanical, electrical and plumbing systems.

DOMESTIC WATER PIPING

- Original from 1958 or 1991 are nearing or have exceeded their useful life.
- Lead found in water since 2019

SANITARY PIPING

- Original from 1958 or 1991 are nearing or have exceeded their useful life.

PLUMBING FIXTURE

- Most of the plumbing fixtures are not ADA compliant.

GYMNASIUM

- Existing metal halide lights from 2007 lights to be replaced with LED lighting

EXTERIOR LIGHTING

- Existing metal halide lights to be replaced with LED lighting

WORK AREA

- No ventilation hood
- Convection oven is worn out.
- Not many worktables to prep food.

WALK-IN FREEZER / COOLER

- Boxes are old and need to be replaced.
- Light fixtures are missing.

DISHWASHING

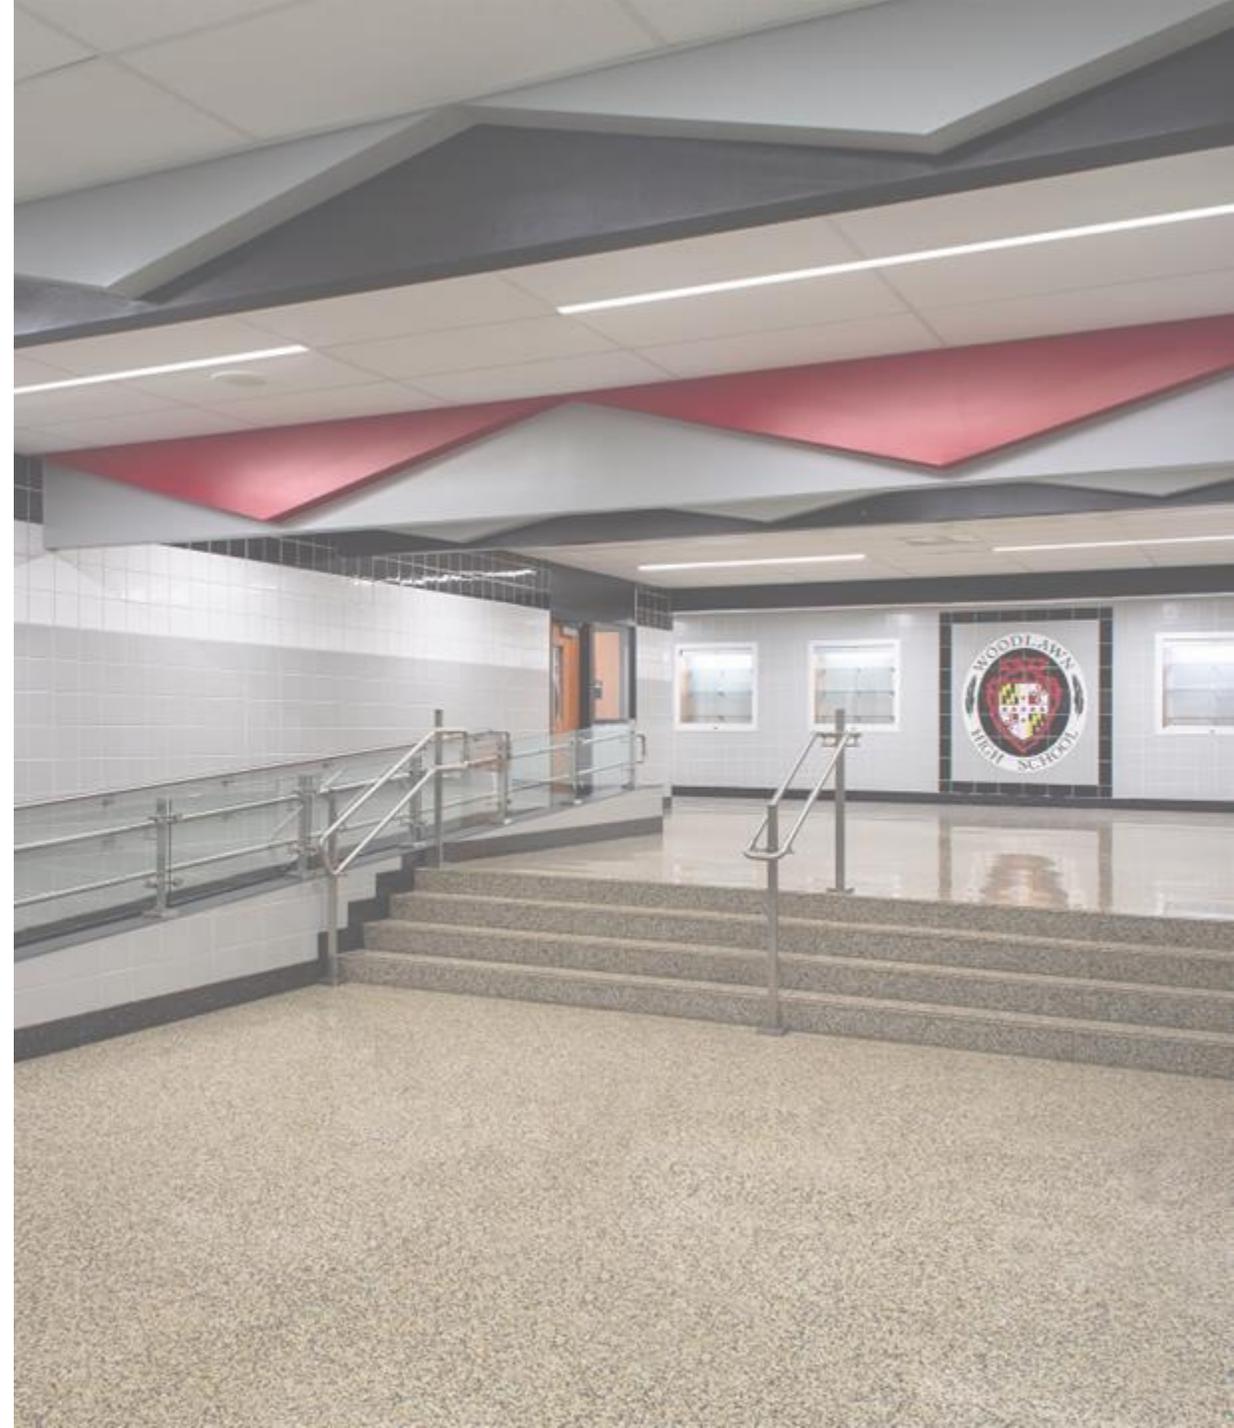

- Original three-compartment sink needs to be replaced.

Approach 2 – Project Goals

ADA Upgrades & Light Renovations

Work Collaboratively with all Stakeholders to:

1. Add handrails to ramp at corridor near kindergarten classrooms for code compliance.
2. Provide accessible route to platform.
3. Reconfigure Main Office to provide accessibility.
4. Ensure Health Suite is accessible.
5. Provide ADA access to all spaces with small addition to improve circulation.
6. Provide accessible routes to building entry points.
7. Provide separation between bus and car circulation.

Approach

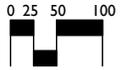

2

ADA Upgrades and Light Renovations

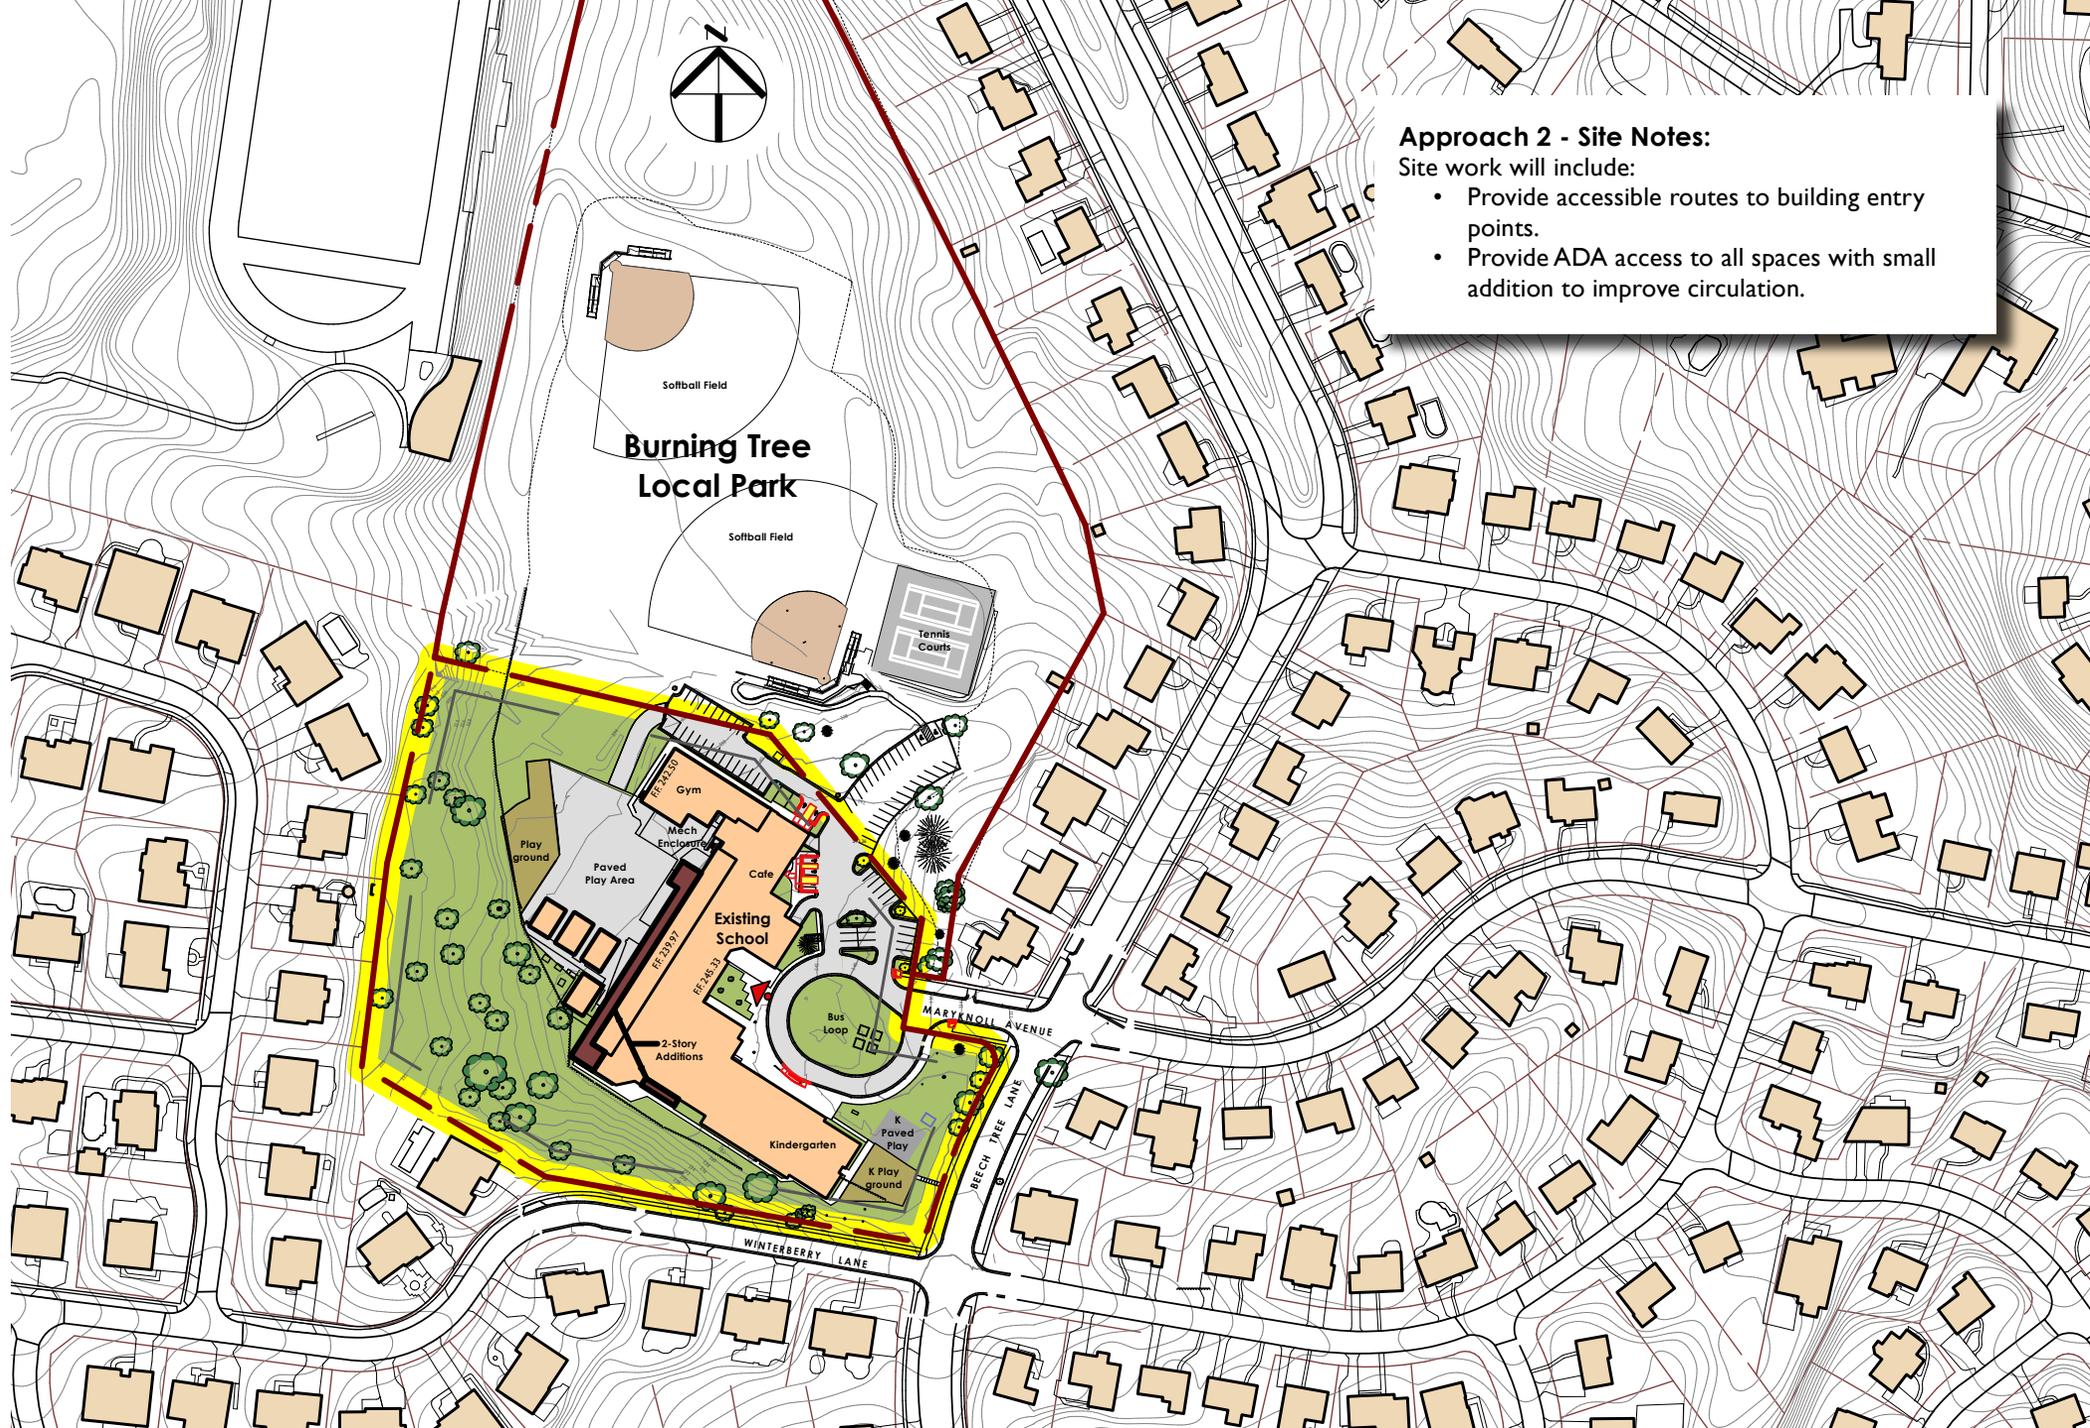

Site Plan

Burning Tree ES
27 May 2025

Parking Tabulations

Standard Parking Spaces	68
HC Parking Spaces	7
Total Parking Spaces	75

Approach 2 - Site Notes:
Site work will include:

- Provide accessible routes to building entry points.
- Provide ADA access to all spaces with small addition to improve circulation.

CLASSROOMS

- Students and staff access classrooms through stairwells.

STAGE

- The stage does not have a ramp for access.

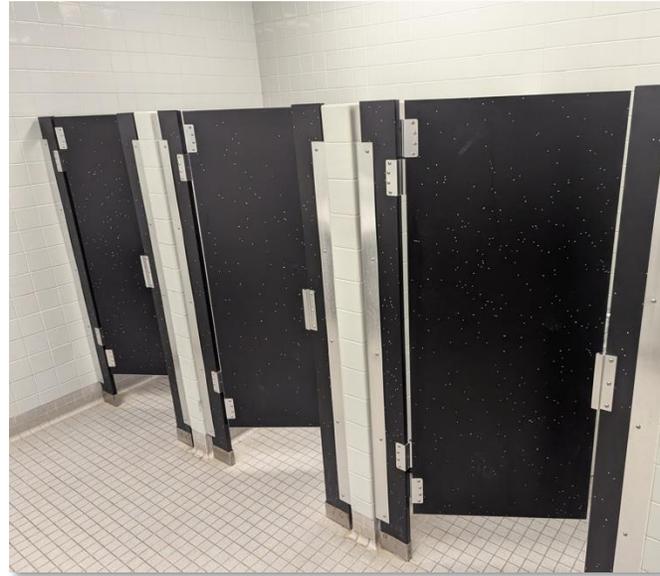

ROOM SIGNAGE

- All signage throughout the building are missing braille patterns and have a fair bit of wear and tear.

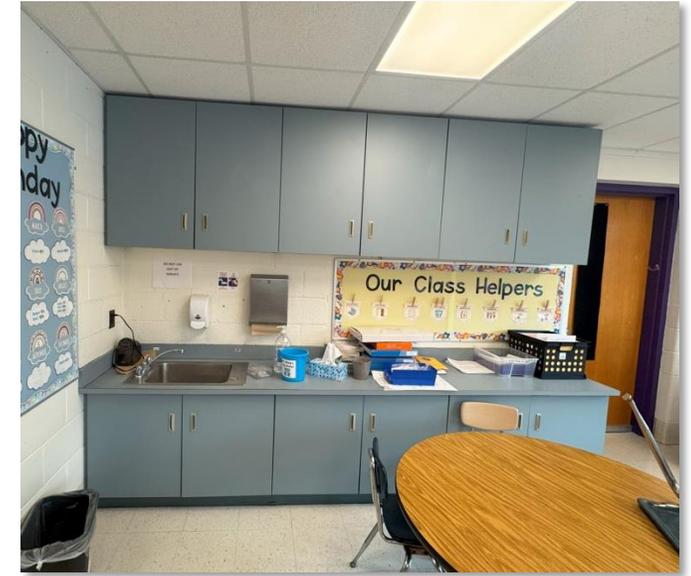

DOOR CLOSERS

- Must meet the requirement of not exceeding 5 pounds per square inch of pull for ADA requirements

TOILET ROOMS

- In some of the larger toilet rooms, there are no ADA accessible stalls.

CLASSROOM SINKS

- The sinks found within the classrooms are not ADA compliant as the constraints for a sideways approach is not met.

Approach 3 – Project Goals

Major Renovations and Addition

Work Collaboratively with all Stakeholders to:

1. Increase building by approximately 18,000 sf to meet Ed Spec.
2. Remove Relocatables.
3. Provide accessible routes to building entry points
4. Provide separation between bus and car circulation
5. Provide new chiller, boiler and generator.
6. Install new roof.
7. Provide new finishes throughout.
8. Provide new exterior doors and windows.
9. Update Mechanical, Electrical and Plumbing systems.
10. Provide ADA accessibility throughout school.

Renewal

Site Plan

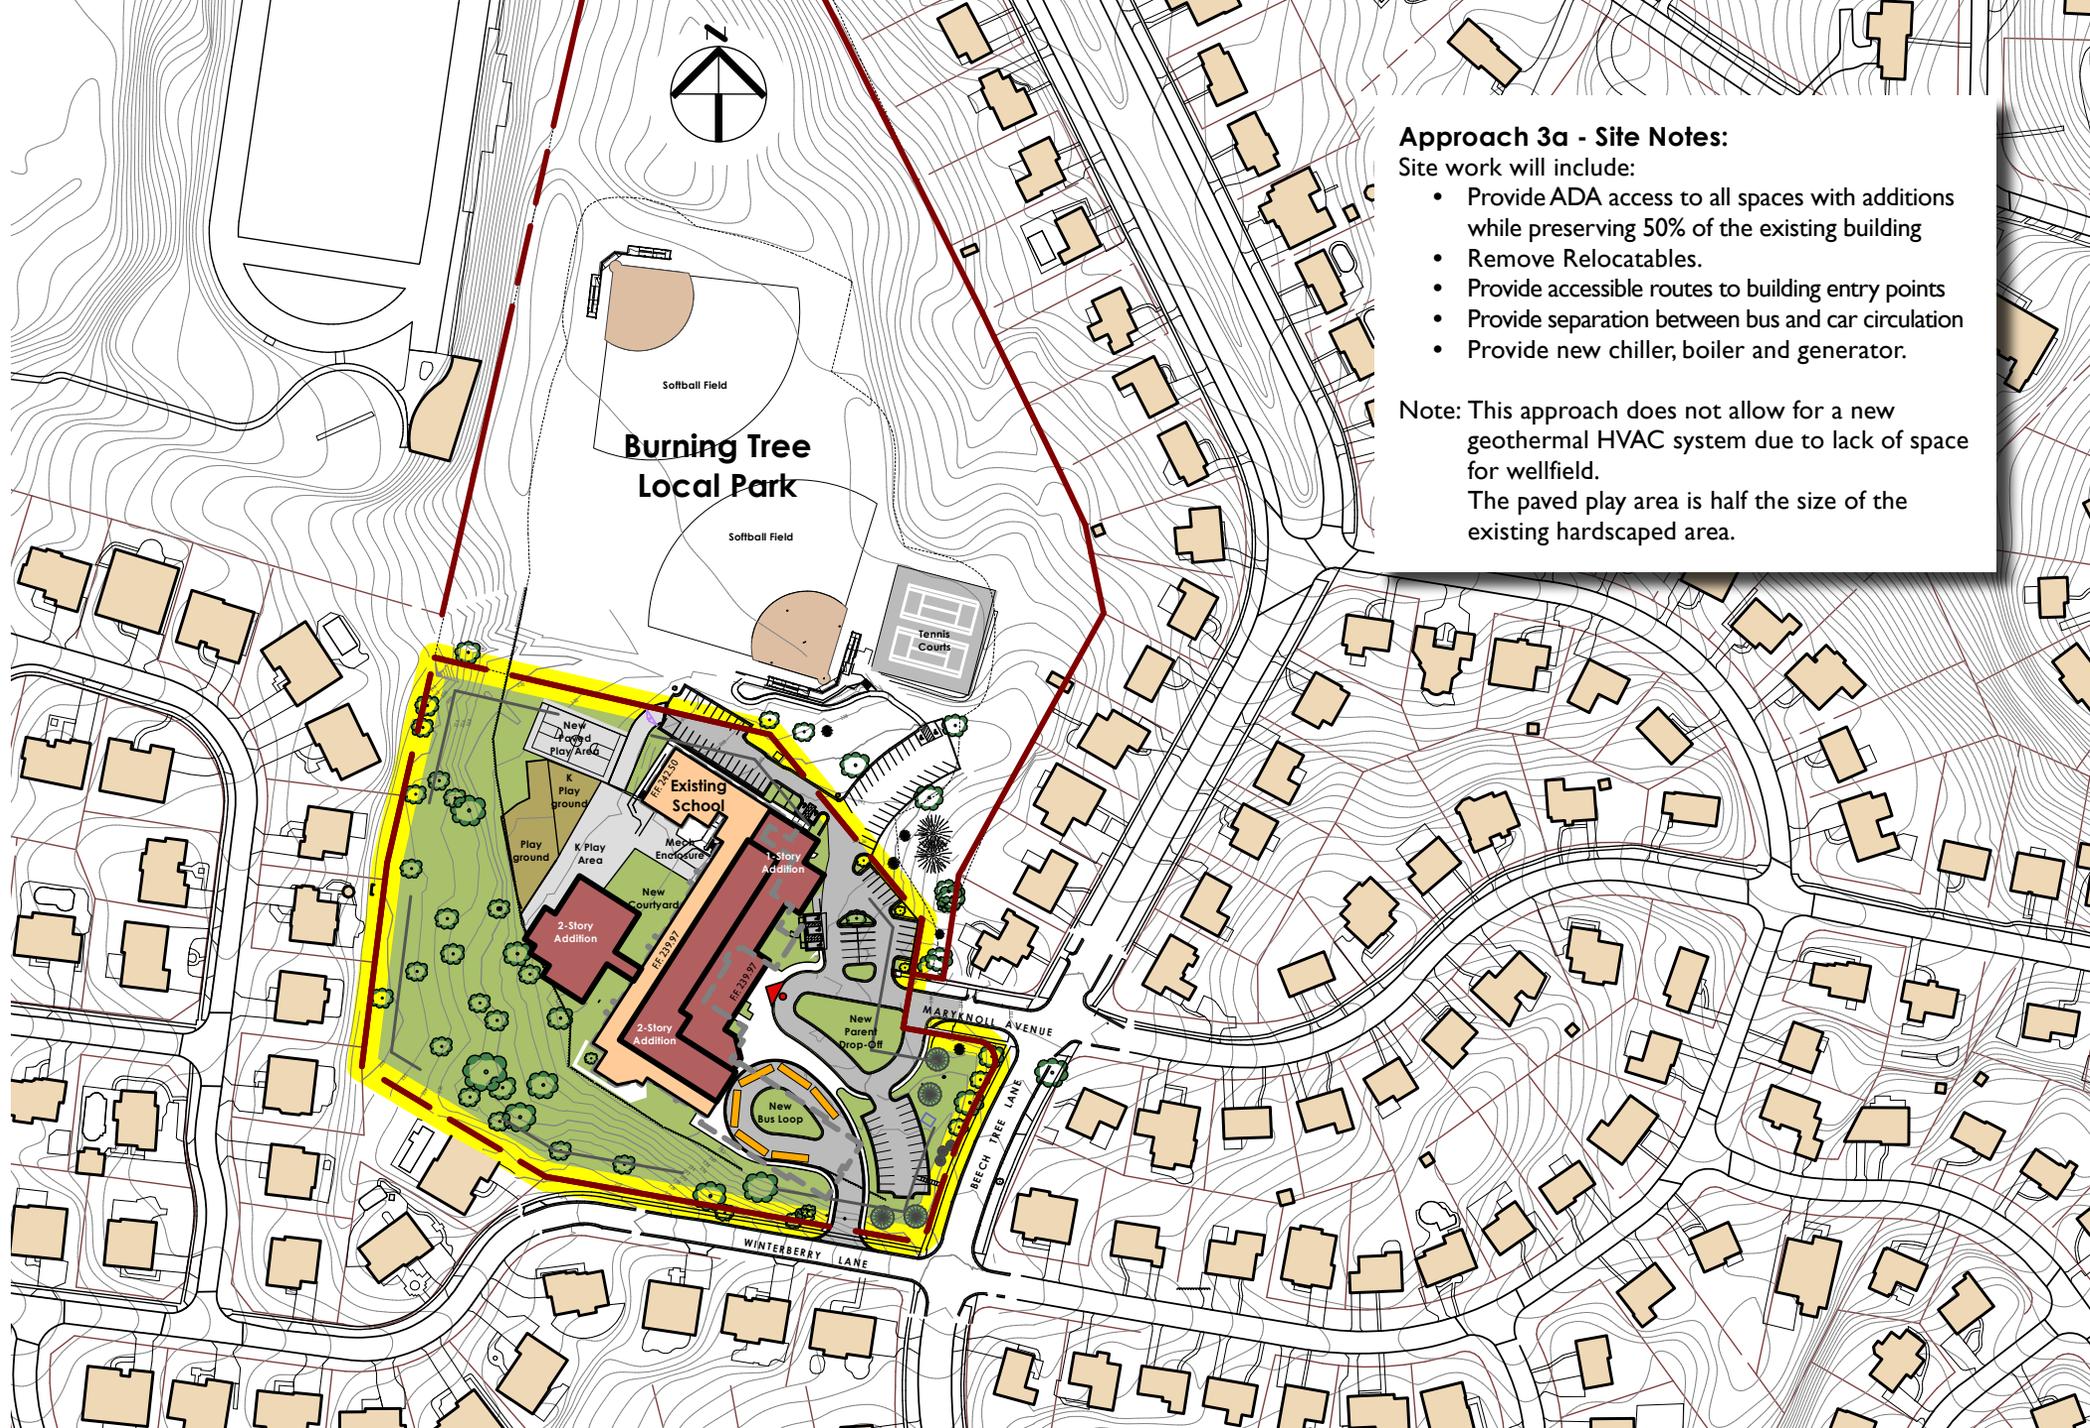

Burning Tree ES

27 May 2025

Parking Tabulations

Standard Parking Spaces	94
HC Parking Spaces	7
Total Parking Spaces	101

Approach 3a - Site Notes:

Site work will include:

- Provide ADA access to all spaces with additions while preserving 50% of the existing building
- Remove Relocatables.
- Provide accessible routes to building entry points
- Provide separation between bus and car circulation
- Provide new chiller, boiler and generator.

Note: This approach does not allow for a new geothermal HVAC system due to lack of space for wellfield.

The paved play area is half the size of the existing hardscaped area.

Approach

3b

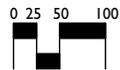

Renewal

Site Plan

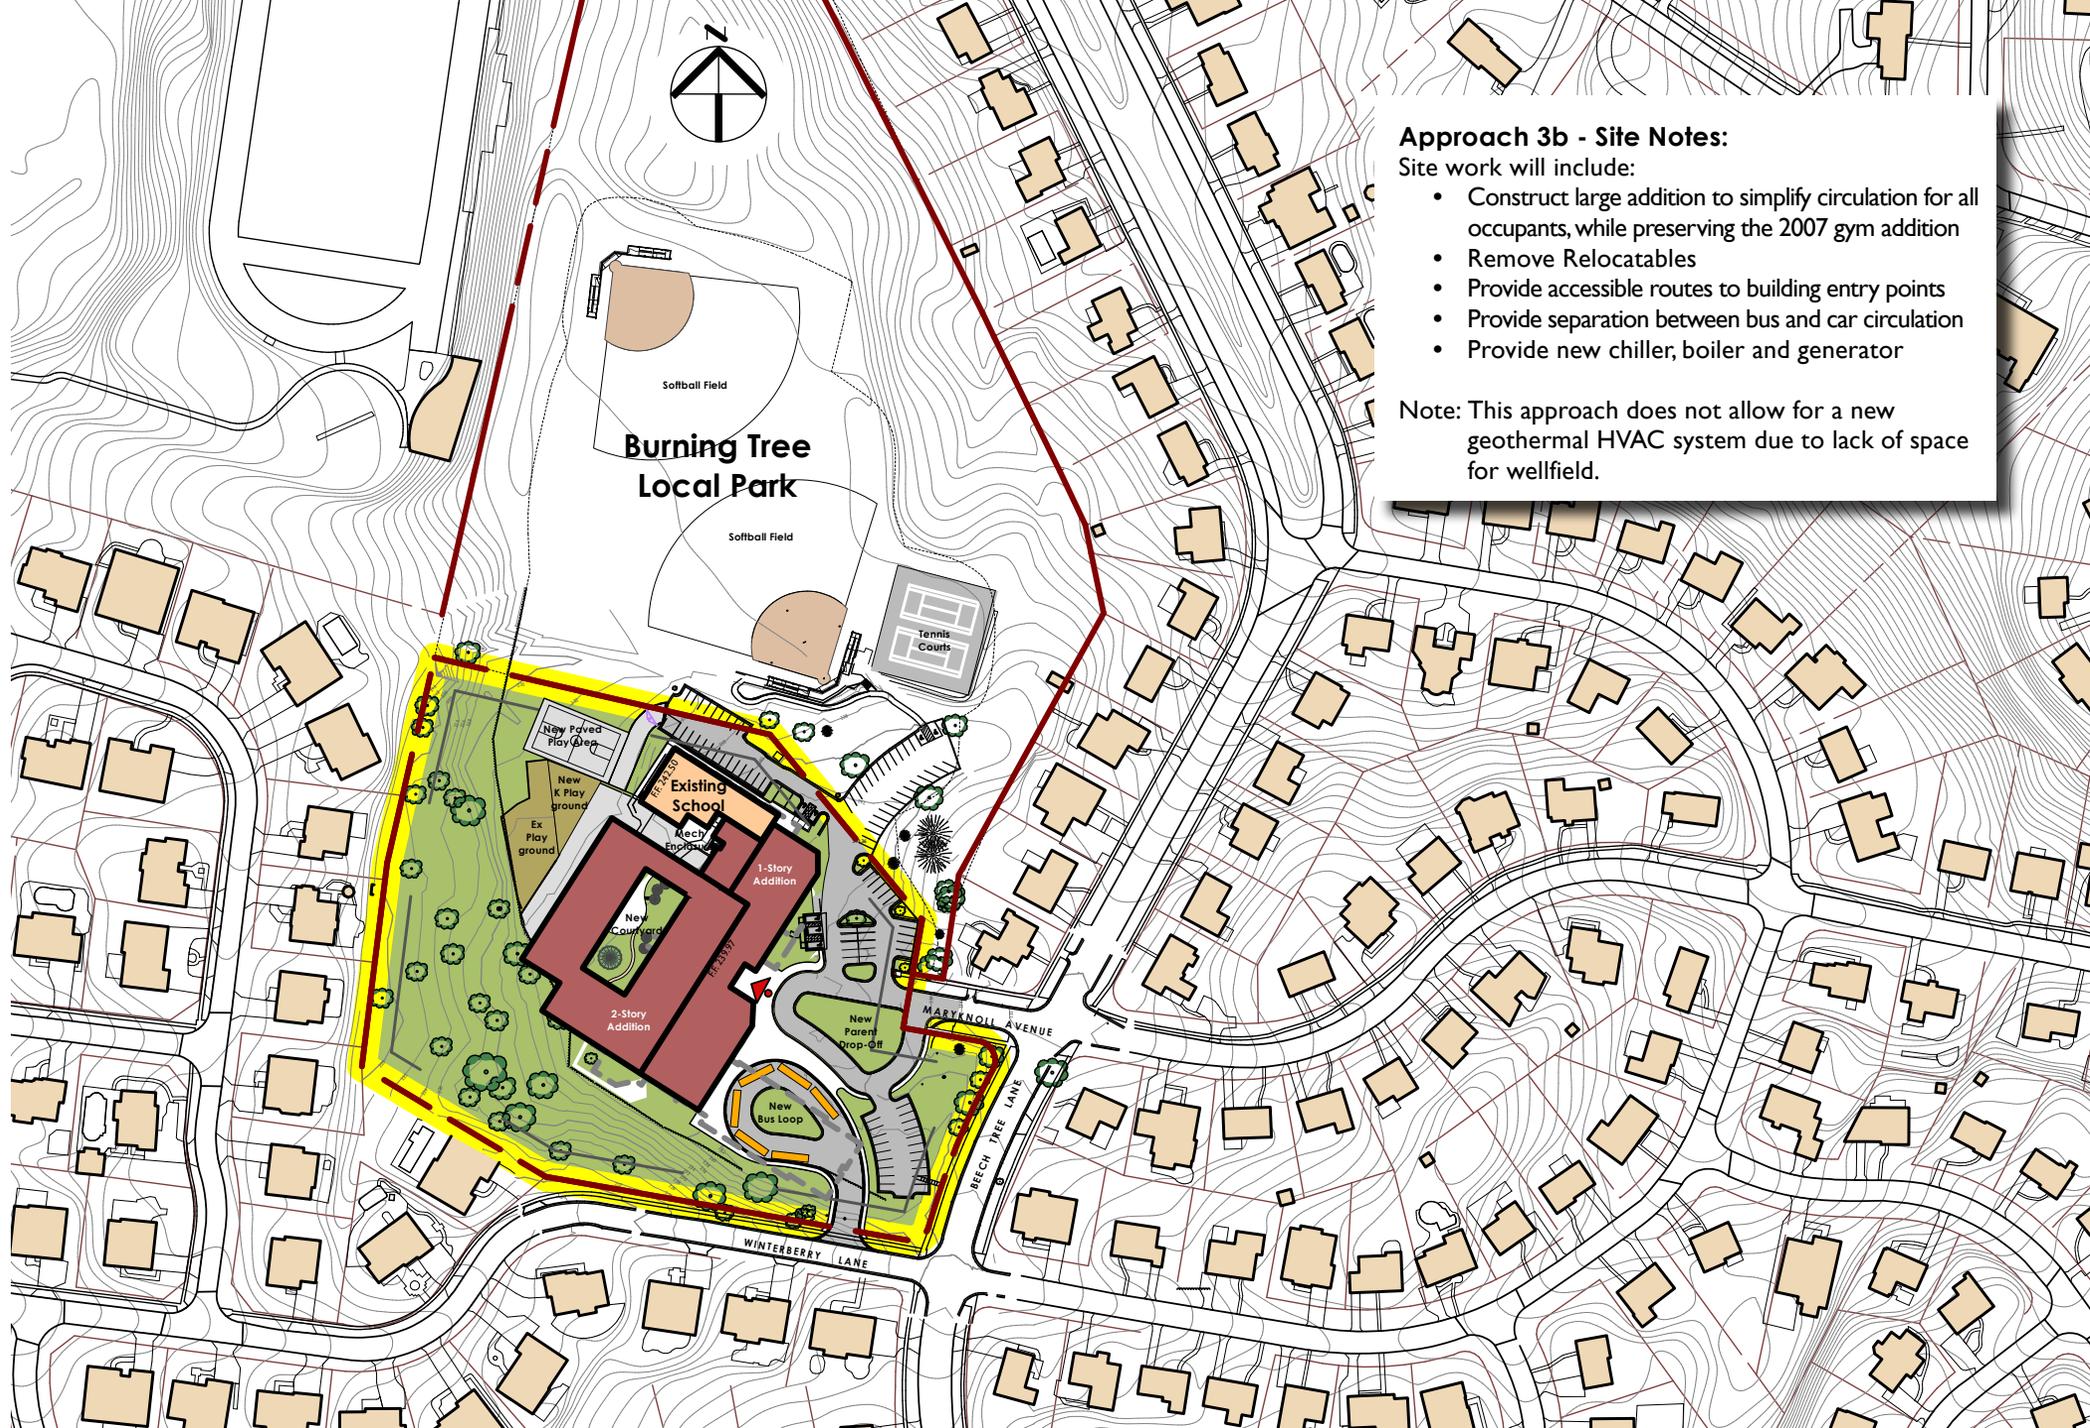

Burning Tree ES

27 May 2025

Parking Tabulations

Standard Parking Spaces	94
HC Parking Spaces	7
Total Parking Spaces	101

Approach 3b - Site Notes:
Site work will include:

- Construct large addition to simplify circulation for all occupants, while preserving the 2007 gym addition
- Remove Relocatables
- Provide accessible routes to building entry points
- Provide separation between bus and car circulation
- Provide new chiller, boiler and generator

Note: This approach does not allow for a new geothermal HVAC system due to lack of space for wellfield.

Approach 3b

Major Renovations and Additions

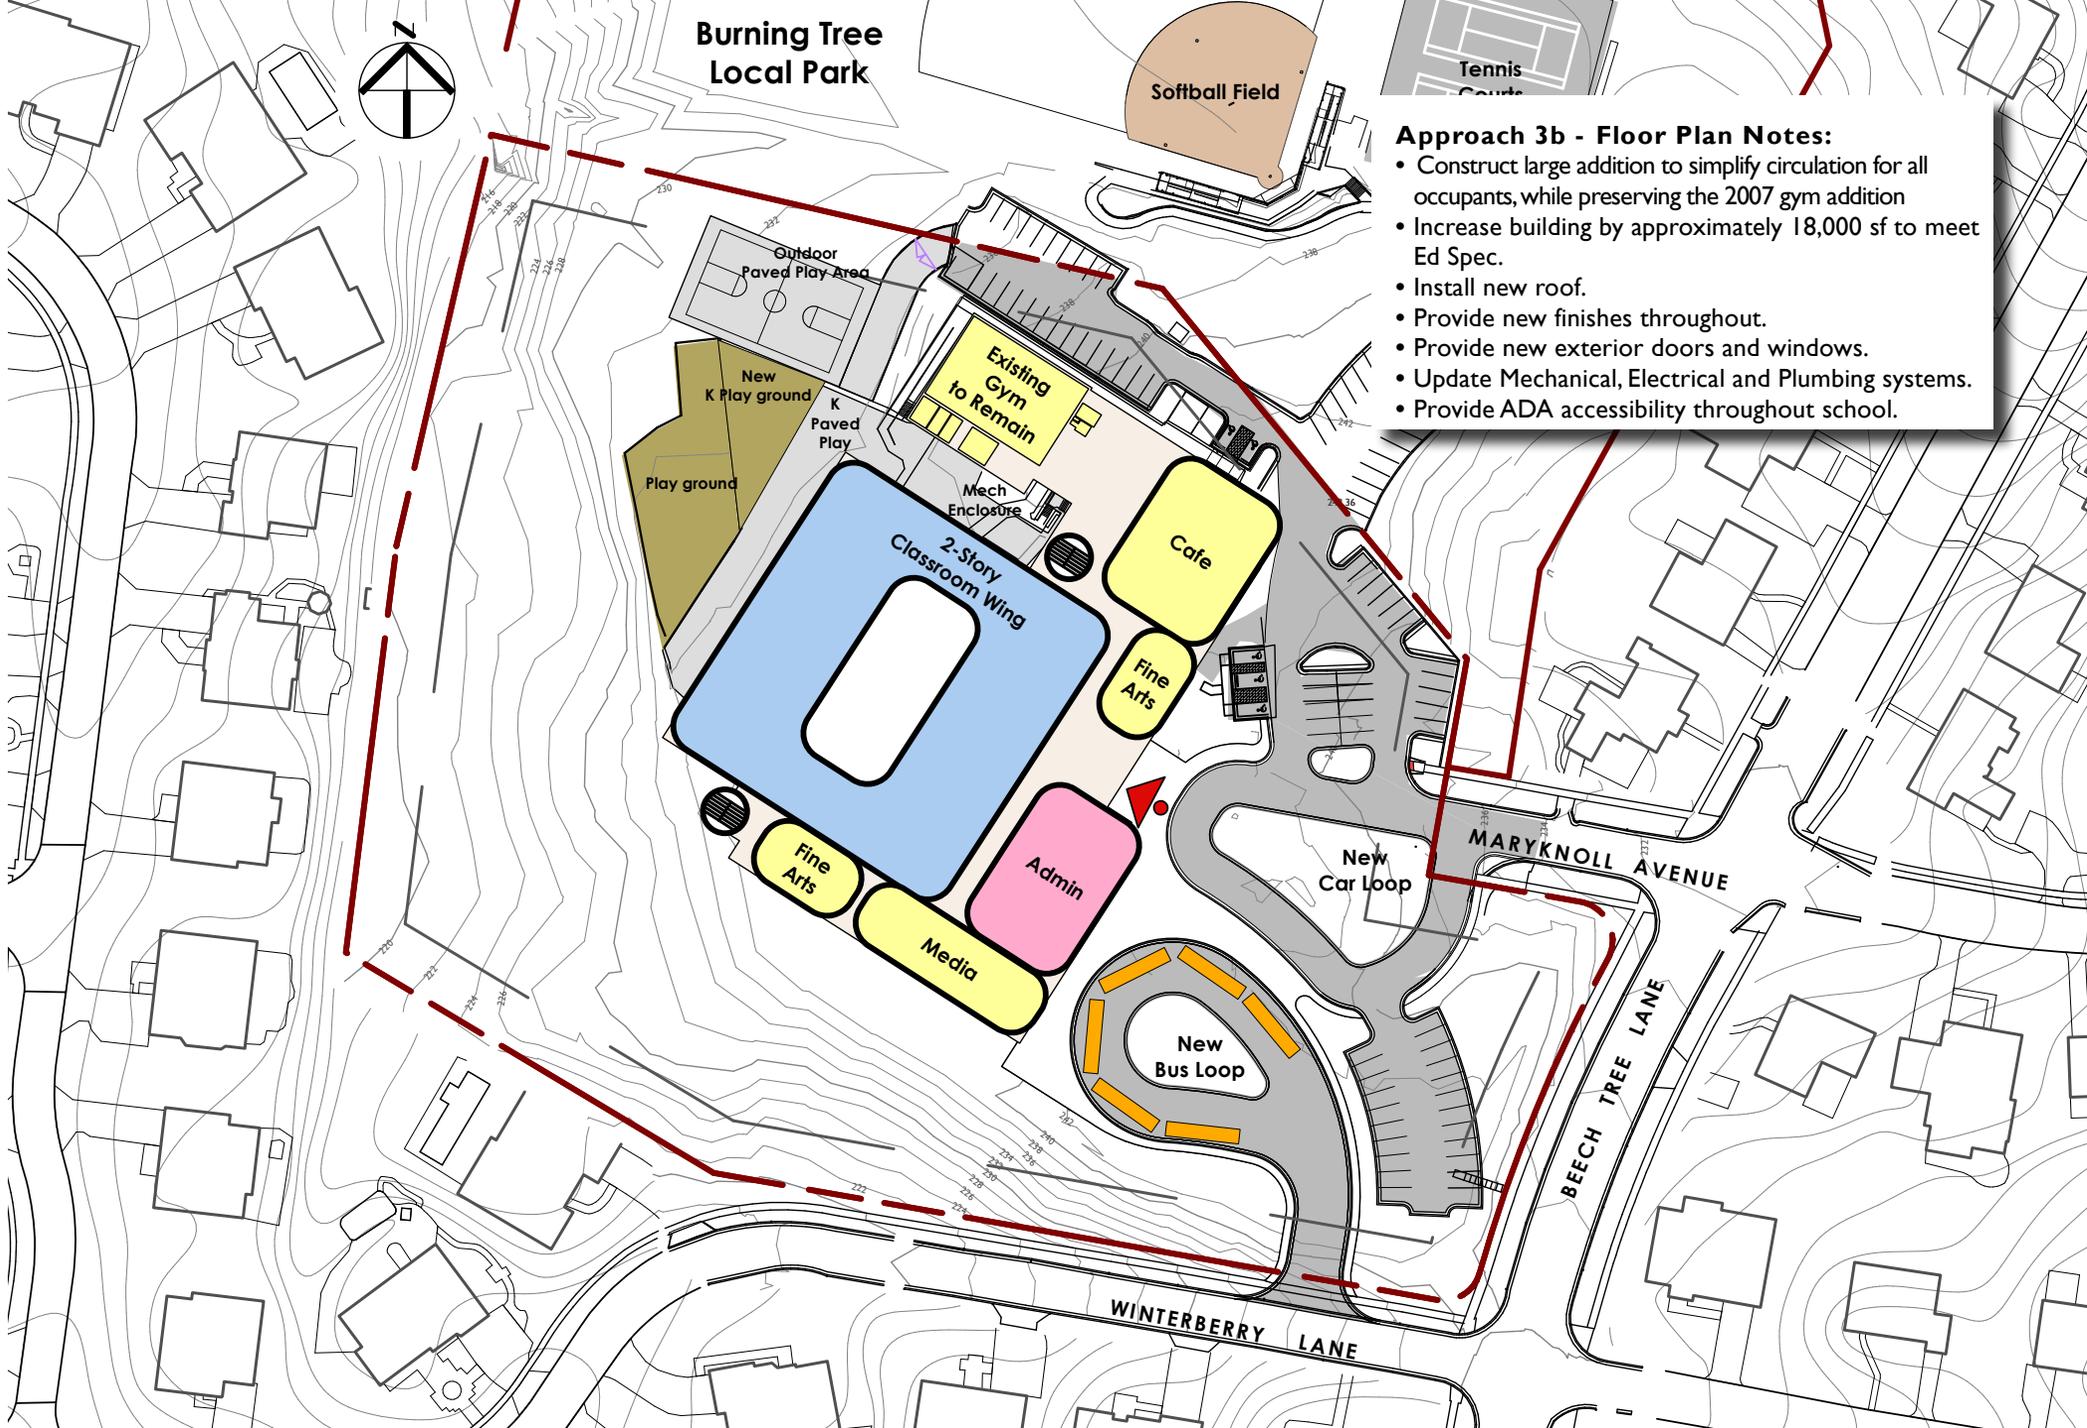

Floor Plan

Burning Tree ES
27 May 2025

Gross Square Footage

Existing Building	68,119 gsf
Area of Demolition	- 60,850 gsf
Area of Addition	± 79,050 gsf
Total Area of Building	± 86,319 gsf

Approach 3b - Floor Plan Notes:

- Construct large addition to simplify circulation for all occupants, while preserving the 2007 gym addition
- Increase building by approximately 18,000 sf to meet Ed Spec.
- Install new roof.
- Provide new finishes throughout.
- Provide new exterior doors and windows.
- Update Mechanical, Electrical and Plumbing systems.
- Provide ADA accessibility throughout school.

Comparison of Approach 3

a

b

Approach 4 – Project Goals

Replacement School

Work Collaboratively with all Stakeholders to:

- Provide a new building to blend with neighborhood
- Provide separation between bus and car circulation
- Compliant to current codes and standards
- High Performance School, with new HVAC
- Energy Efficient Building Envelope
- Prioritize Daylighting and Views
- Use CPTED strategies for safe and secure school
- Sustainable Certification
- Compact Footprint to reduce limit of disturbance
- Create a Celebrated Entry
- Support collaboration
- Improve acoustical design
