Wastewater Guidelines!

Dumping water waste or any chemical waste outdoors is prohibited!

Please ensure that all chemical water waste, such as from scrubbers or mop buckets, is disposed of in an **indoor** sanitary drain, such as in a building service closet disposal area. When chemical water waste is disposed of in a building service closet disposal area, please flush the drain with hot water so the waste fluid does not harden and clog the drain. **Do not pour custodial waste products outdoors.** This negatively impacts the environment by entering the storm water systems that goes to the Chesapeake Bay.
